

Contract manufacturing at STOCKMEIER Chemie

Your partner for chemical toll manufacturing

Our specialists at your service

**Customised solutions from small batches to large-scale production.
As a certified partner, your filling and mixing projects are in good hands.
No matter if liquids, powders or granules.**

STOCKMEIER Chemie specialises in the production of aqueous, solvent-based, and powdered mixtures, as well as dispersions, emulsifications, polymerisation, and chemical synthesis. Whether you need contract manufacturing or a partner for packaging or filling – we are here to support you!

Since 1920, STOCKMEIER has been a chemical distributor, hence we have more than 100 years of experience in this field. However, STOCKMEIER Chemie's range of services goes far beyond traditional chemical distribution. In recent years, we have expanded our activities and are now also offering toll manufacturing. Important for our success is a centralised coordination of all projects

and we ensure strong cooperation with our chemists, process engineers and all service departments along the project. We can offer a comprehensive service from a single source. Starting with chemical-technical questions, through sampling, laboratory, analytics, and technical center, to the creation of product and safety data sheets. We ensure high standards and industry-standard certifications through our quality management in all processes.

Our services at a glance

Contract mixing

- Processing of liquids and solids

Chemical reactions

- Tailor-made syntheses, e.g., esterification and polymerisation

Contract filling

- Small packaging units to IBCs
- Automated & manual lines

Packaging and labeling

- Labeling service (GHS compliance)
- Packaging procurement

In addition, we also offer consulting, quality analysis and logistics services.

Benefit from our range of services

Manufacturing processes	Equipment	Typical capacities / batch size
-------------------------	-----------	---------------------------------

Liquid Blends and Formulations, Packaging

Liquid blending, inorganic and organic	Temperature-controlled mixing vessels incl. auto claves	50 l - 28.000 l
	Mixing vessels in explosion-proof (Ex) design	50 l - 10.000 l
Emulsifying, homogenising and dispersing	Stainless steel autoclaves incl. dissolver and Turrax agitator	8 - 10 m ³
Contract filling, small and large containers	Semi- and fully automatic filling lines	0,5 l - 1.000 l
Paste formulations		

Solid Blends and Formulations, Packaging

Powder blending	Powder mixers, stainless steel, with milling / sieving unit and spray function	3 m ³
Powder packaging	Semi-automatic powder filling system	0,5 kg - 200 kg
	Fully automatic powder filling line	5 kg - 100 kg bags
	Powder filling line	2 kg - 1.000 kg
Tableting	Tablet presses (also 2-phase)	1 g - 50 g tablets
	Blister lines, single to multi-blister	
Milling		
Sieving		

Chemical Reactions with Pre-Treatment and Post-Processing

Polymerisation + crystallisation	PVA mixing vessels, stainless steel, heatable and coolable	2 m ³ , 20 m ³ and 28 m ³
Chemical synthesis + coating	Reactor in Ex design + PVA mixing vessels + autoclaves	2 - 28 m ³
Thermal treatment	Heating chambers	2 pallet spaces each
Vacuum drying	Powder dryer	1,35 m ³ binder requirement

Further Applications

Special blends	Lead mixers, PVC and GRP design, dilution units	
Scale-up	Laboratory – pilot – production scale dilution units	
Tank storage	Production storage tanks	up to 33 m ³
Laboratory / analytics services + product development		
Waste disposal operations		

In addition, we are open for discussions about expanding our plant capacity for your demand and we will work with you to develop the optimal solution for your project.

Our strength: Everything from one supplier – from raw material sourcing to final delivery. Across Germany.

Our various locations are equipped with state-of-the-art production facilities, a technical center, and development laboratories.

Here we manufacture, process, package, fill, and store all forms of chemical preparations on your behalf, whether aqueous, solvent-based, or powdered. Simple and complex mixtures, dispersions and emulsions

are just as much a part of our core competencies as synthesis in various batch sizes, including ATEX and controlled process management at different temperatures, pressures, and viscosities.
