

# KAPPACLEAN MAKE-UP

## Stain Remover

Chemical composition	Formulation of washing-active substances with nitrogenous polymers
Appearance	clear, yellowish liquid
pH-value 20 °C	approx. 9.0 (product)
Density 20 °C (g/ml)	approx. 1.02

### Function

KAPPACLEAN MAKE-UP is a specially developed stain remover for the partial removal of stains caused by cosmetic products such as make-up, lipstick, blush, powder, kohl, when wearing, fitting on or in use with textiles.

### Application

The treatment should always be done before washing. The textiles must be checked first of all in a convert part, for example on the hem, for colour changes and durability.

#### Non-washable textiles:

Soak the relevant stain area well with KAPPACLEAN MAKE-UP and let it react for approx. 15 minutes. Dab the area with a moist, preferably white cloth until the stain and residues of the excess KAPPACLEAN MAKE-UP are removed.

For tenacious stains, the exposure time can be increased or a further moistened with KAPPACLEAN MAKE UP can be served, but the product should not dry out.

#### Washable textiles:

Soak the relevant stain area well with KAPPACLEAN MAKE-UP and let it react for approx. 15 minutes. Dab the area with a dry, preferably white cloth until the stain and residues of the excess KAPPACLEAN MAKE-UP are removed.

For tenacious stains, the exposure time can be increased or a further moistened with KAPPACLEAN MAKE UP can be served, but the product should not dry out. Afterwards rinse the fabric well under floating water and wash according to the care instruction.

#### Not suitable for leather!

### Dilution instruction

KAPPACLEAN MAKE-UP can be diluted with water at any ratio.

### Storage

KAPPACLEAN MAKE-UP remains stable for at least 1 year if stored properly and cool in a tightly closed container.
